

GRP FIBREGLASS KIOSK SPECIFICATIONS

Our GRP kiosk is weather proof with an IP65 rating and can be used to protect and secure pump control panels and other electrical equipment from tampering or exposure to moisture.

These free standing fibreglass electrical cabinets are available in two standard sizes, the GRP1, which is 750mm wide with a single door and the GRP2, which is 1250mm wide with double doors.

The frame and doors on our GRP kiosks are manufactured from impact resistant fibreglass that has been pigmented green, the base is open to allow underground cabling to be fed up directly inside the kiosk.

The kiosks are fitted with the following equipment as standard:

1. High Impact resistant fibreglass body, pigmented green
2. High Impact resistant fibreglass single or double doors and frame
3. Stainless steel hinges and handle
4. Cylinder lock and keys
5. 9mm marine ply interior backing board
6. Open base
7. Sloping roof for weather run-off
8. IP65 rated

GRP 1

GRP 2

	Height (mm)	Width	Depth	Doors
GRP 1	1250	750	400	1
GRP 2	1250	1250	400	2
