

REMORA CL02 CHEMICAL FEEDER

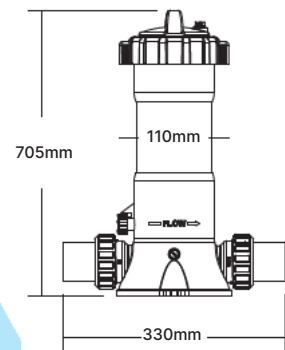

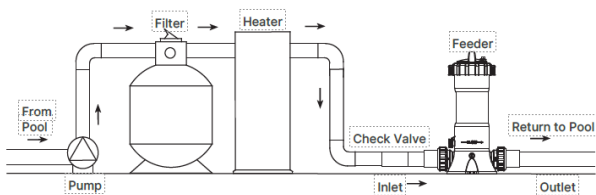

KEY FEATURES

- Automated chlorination of pools up to 108m³
- Holds approx. 4kg of tablets; equivalent to:
 - 198 × 20g chlorine, bromine or active oxygen tablets*
 - 22 × 200g chlorine, bromine or active oxygen tablets*
- Provides 1-2 weeks chlorination for larger pools
- Easy in-line installation after existing equipment
- Dial control allows you to adjust flow rate through the feeder
- Water connections 1½ inch or 50mm
- Compact size, 705mm x 330mm x 110mm (H x L x W)
- No running costs, feeder works by water pressure
- Removes need for floating dispensers or liquid chemicals
- Simple to adjust if more or less chlorine required

HIGH CAPACITY

- 10ppm up to 27,000L (24 hour period)
- 5ppm up to 54,000L
- 2.5ppm up to 108,000L

APPLICATIONS

Economical, user-friendly solution for sanitising swimming pools up to 108m³ using slow dissolving chlorine, bromine or active oxygen tablets*.

Inline installation on pressure pipe after the existing filtration and heating equipment, a check valve should be fitted before the feeder.

Dial control valve adjusts flow rate, regulate valve setting and amount of tablets to maintain correct chlorine level of pool.

* Never mix tablets or use any other chemicals
