

Floating Fitness

For pool fitness

A FUN ACTIVITY

This floating mat is designed to allow all swimming pools to offer a new aquatic activity, without the constraints of depth of water or shape of pool.

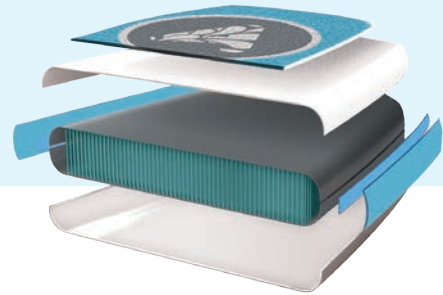

The Aquafitmat is inflated like a paddle, designed to be easily fixed between two water lanes thanks to the attachment kit. This educational mat has been created to use the balance-imbalance technique. Patterns printed on the EVA covering allow users to clearly identify the workout zones indicated during the session.

This mat enables the coach to structure the session and facilitate the course.

DROP STITCH TECHNOLOGY ULTRA-RIGID

This mat has the benefit of Drop Stitch + Double Skin technology, comprising a mesh of thousands polyester fibres reinforced by a PVC layer. Extreme rigidity and unrivalled sturdiness, ideal for all types of audience.

AQUAFITMAT

You will like the Aquafitmat's non-slip covering in soft EVA for user comfort, as well as its large width (81cm) that gives it excellent stability, even for complex yoga postures.

With its many rings, the floating mats interlock with each other and allow multiple configurations. Optionally, clip the water resistance bands to the edges!
