

Holl's

Holl's
The art of wellness

“

A brand born of a
moment where time
stands still

”

The art of wellness.

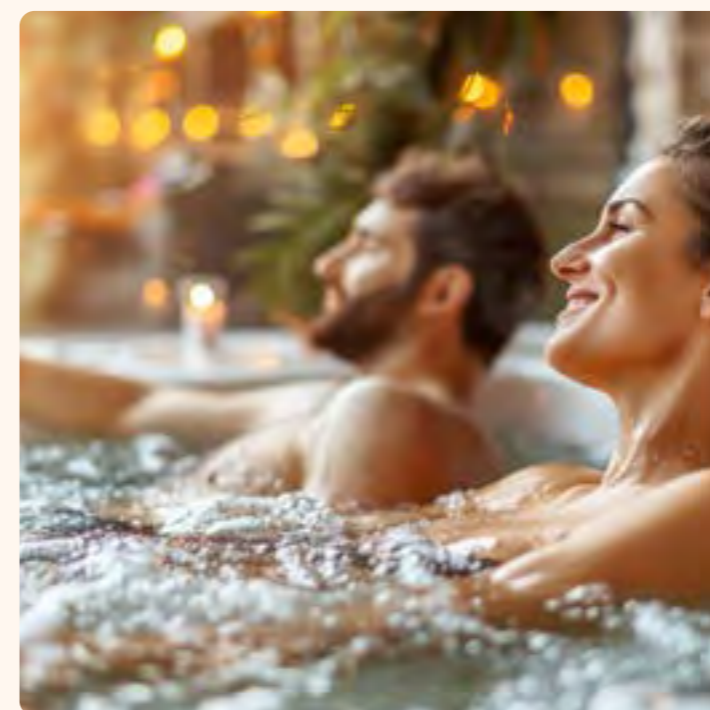

Holl's was born of a moment of calm and inspiration. During a trip to Finland, Raphaël Elbaz discovered a unique culture: one of well-being rooted in everyday gestures. There, the sauna is not a luxury. It is a ritual, a refuge, a breath of fresh air. This relationship between the body and the present moment, so simple and so right, became a revelation for him.

Back in France, he envisioned a brand that could recreate this sense of deep harmony, enriched with a distinctly French aesthetic sensibility. And so Holl's was born in the heart of Provence.

Equipment conceived as integral parts of your living environment

At Holl's, we craft saunas and spas that embody both wellness and exceptional design. Our mission is to enable anyone to create a tranquil haven in their own home, without compromising on quality or style.

Made from premium, sustainably sourced materials, our saunas are meticulously assembled. Our European-crafted spas bring together hydrotherapy, chromotherapy, and refined ergonomics to deliver a complete sensory experience, for solitary moments or shared enjoyment.

Well-being at your fingertips, and in your heart.

We believe in a sincere, understated kind of luxury — one that doesn't strive to impress, but quietly enhances everyday life.

Holl's is for people who want to unwind, reconnect, and regain their balance in a world that's moving too fast. Our creations embody this promise: wellness that is accessible, enduring, and deeply restorative. They invite you to rediscover the gentle luxury of time for yourself.

French signature wellness

Based in Provence, Holl's is inspired by the elegance of French design, European craftsmanship, and the power of Nordic traditions.

This unique alliance results in designs that are both timeless and contemporary, quietly refined yet distinctive, conceived to integrate harmoniously into any interior.

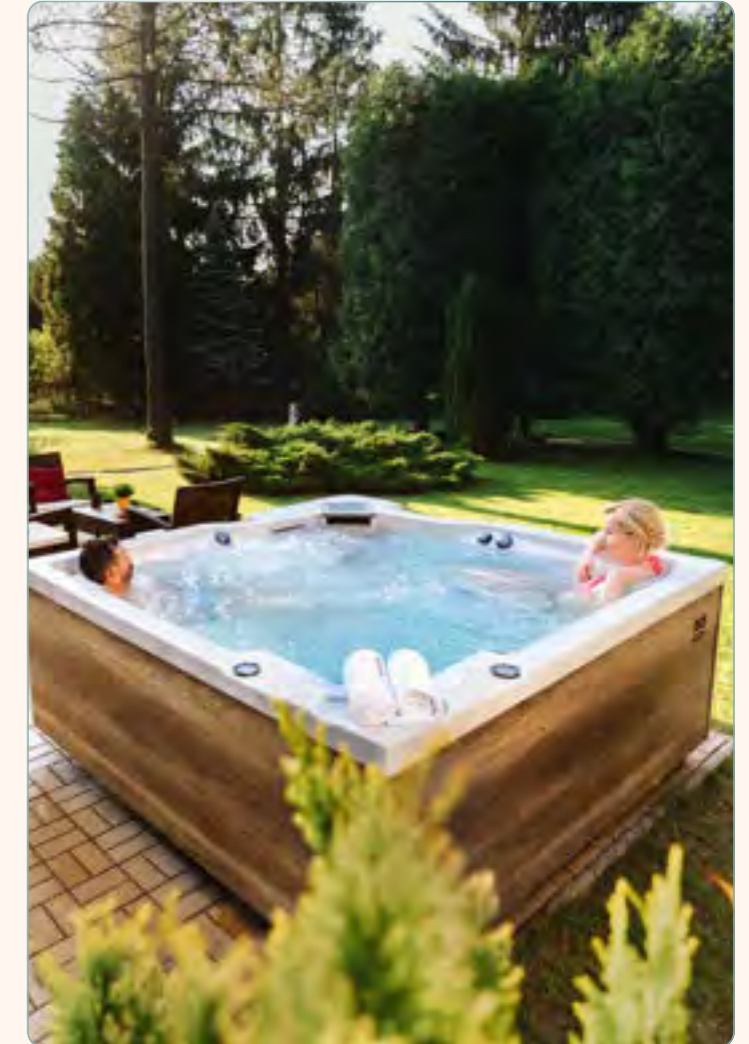

More than a brand, Holl's embodies a philosophy: elevating wellness into a way of life.

WOOD

Materials and experience

At Holl's, every sauna begins with the choice of wood. A choice guided by respect for nature, a quest for comfort, and a commitment to lasting quality.

Spruce and hemlock shape the cabins of our indoor saunas, bringing strength, stability, and a warm atmosphere with natural tones. Inside, abachi reveals a quiet softness. Naturally low in heat conductivity, it remains gentle to the touch, turning each moment of rest into an invitation to unwind.

All wood used is sourced from FSC-certified forests, ensuring responsible and sustainable forest management.

FOCUS ON

ThermoWood® & Thermo-Treated woods

When it comes to outdoor saunas, Holl's selects wood that is carefully prepared to withstand the most demanding weather conditions. Depending on the model, they are crafted from thermally treated pine or ThermoWood®, two materials renowned for their stability, durability, and natural resistance.

- High resistance to weather and climatic variations
- Excellent dimensional stability, reducing the risk of warping
- Enhanced durability without chemical treatment
- Optimised thermal performance
- Warm aesthetics and a naturally deep colour
- Wood selected specifically for demanding outdoor use

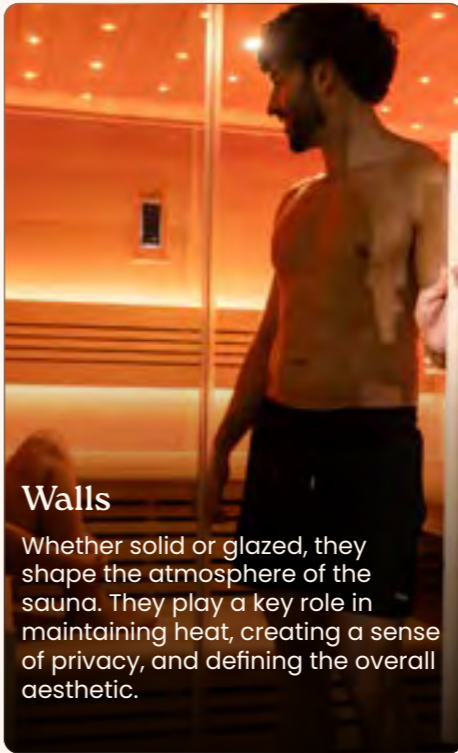

The quiet balance of the sauna...

Behind the understated elegance of a sauna lies a design process of remarkable precision. Every element, from the wood to the openings, contributes to an overall harmony that shapes the quality of the experience.

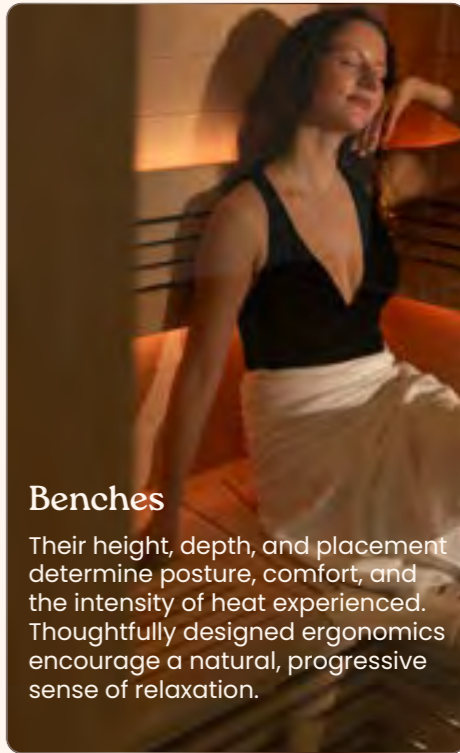

Wooden structure

The structure forms the foundation of the cabin. Carefully selected wood, expertly crafted joinery, and precisely calibrated thickness ensure stability, thermal performance, and durability.

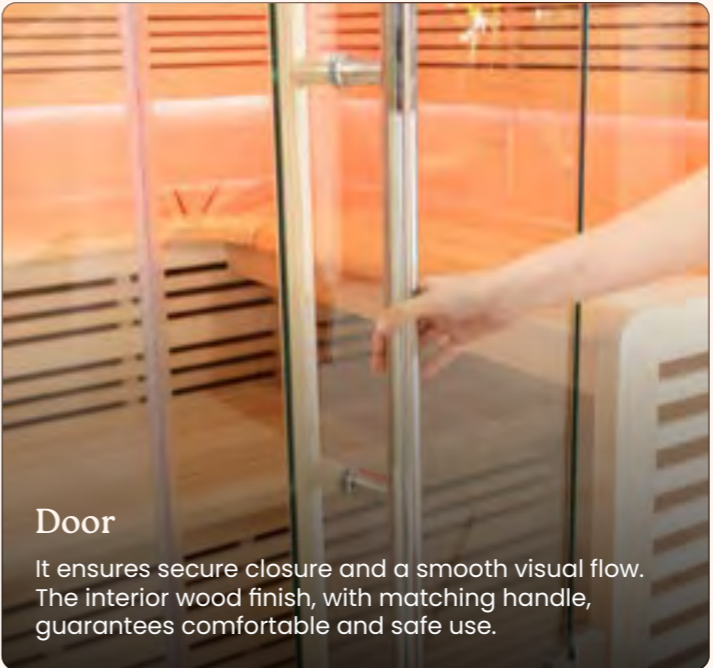

Walls

Whether solid or glazed, they shape the atmosphere of the sauna. They play a key role in maintaining heat, creating a sense of privacy, and defining the overall aesthetic.

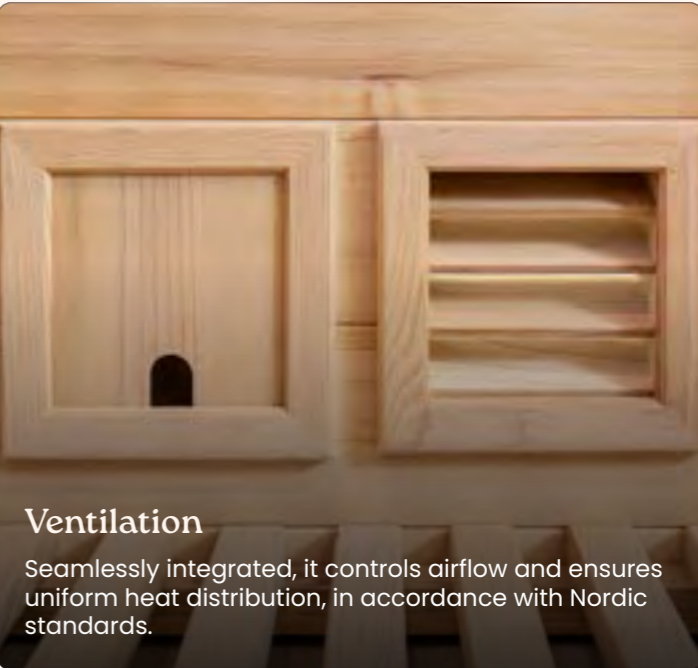

Benches

Their height, depth, and placement determine posture, comfort, and the intensity of heat experienced. Thoughtfully designed ergonomics encourage a natural, progressive sense of relaxation.

Door

It ensures secure closure and a smooth visual flow. The interior wood finish, with matching handle, guarantees comfortable and safe use.

Ventilation

Seamlessly integrated, it controls airflow and ensures uniform heat distribution, in accordance with Nordic standards.

Traditional steam.

Traditional wellness

The steam technology of a sauna is based on heating volcanic stones, onto which water is poured, creating a cloud of steam and a dry heat that envelops the body in an intense, gently humid heat (below 25%).

This sensory signature, rooted in the Finnish ritual, offers a gradual rise in temperature, enveloping comfort, and deep relaxation. It transforms every session into an authentic, purifying, and deeply restorative experience.

Ideal for

lovers of authenticity

Average temperature

65-90°C

Average length of a full session

45 min - 1 h (including rest time)

Utopia

Symbioz hybrid

Hestia, Orphée & Cocoon

Benefits

Deep relaxation for the body

Moist heat envelops the body, soothing tension and releasing tightness.

Circulation stimulation

Alternating heat and cold awakens the body's vital energy and restores vitality.

Pure skin

Perspiration opens the pores, deeply purifies the skin, and reveals a brighter, more radiant complexion.

Enhanced immunity

Thermal contrasts naturally stimulate the body's defences.

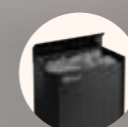

Inner serenity

Steam creates a sense of calm, encouraging deep relaxation and more restful sleep.

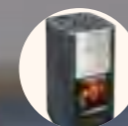

Stoves

Electric & Wood

Whether you are looking for modernity or tradition, your sauna's performance depends on the quality of its heating.

The electric heater ensures ease of use, safety, and precision. With integrated controls or a remote control unit, it offers the perfect balance between user comfort and thermal efficiency.

The wood-burning stove operates using log combustion. The crackling of the flames and the deep, penetrating heat create a unique sensory atmosphere, along with an incomparable soft steam, true to ancestral traditions.

Volcanic Energy

The secret to perfect steam

Lava stones are the key heat-retaining element of a sauna heater. Their durable volcanic structure stores heat and releases it gradually and evenly when water is poured over them.

Careful positioning, combined with natural porosity, promotes hot air circulation and optimizes water vaporization (löyly) during pouring.

High-quality stones ensure efficient steam production, stable heat distribution, and enhanced heater durability.

Rituel traditionnel

1.

**Preparation time
(5 min)**

Take a warm shower to cleanse your skin and prepare your body for the temperature increase. Dry yourself lightly.

2.

**Step into the sauna
(8-12 min)**

Settle in comfortably, breathe slowly, and let the heat take effect gradually.

3.

**Cool down
(5-10 min)**

Take a cool shower, a cold bath, or a break in the fresh air. The aim is to bring your body temperature down gradually.

4.

**Rest & hydration
(5 min)**

Drink water and relax.

These four steps can be repeated 2 or 3 times, depending on your comfort and the experience.

Infrared Technology

A contemporary wellness

At Holl's, we see infrared as a science of deep wellbeing. Through our Quartz, Magnesium, and Carbon technologies, infrared waves act at varying depths of the skin to deliver targeted benefits: relaxation, detoxification, muscle recovery, and cellular revitalisation. This type of sauna delivers a dry, gentle, and penetrating heat, unlike the hammam, which relies on moist heat.

Ideal for
intensive or gentle recovery

Average temperature
40-60 °C

Average length of a full session
25 to 45 min

Moon Canopée Purewave Symbioz hybrid

Infrared technologies

Les rayons

Short-wave infrared (IR-A) :

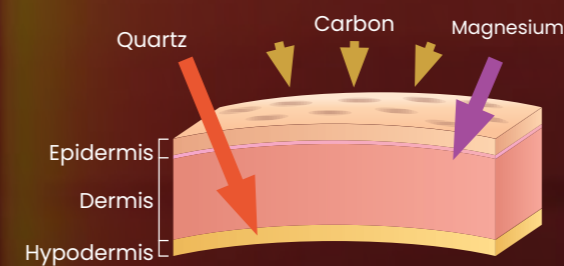

- Used in particular in rehabilitation and physical preparation.
- **Skin penetration depth:** Down to the hypodermis (5 mm).
- **Sensation:** Direct, intense heat.
- **Uses:** Deep muscle or joint pain.

Mid-wave infrared (IR-B) :

- Acts primarily on the dermis.
- **Skin penetration depth:** 0.5 to 2 mm.
- **Sensation:** Moderate heat, more diffuse than IR-A.
- **Uses:** Muscle relaxation and support for superficial circulation.

Far-wave infrared (IR-C) :

- Present in many infrared saunas.
- **Skin penetration depth:** Surface action, with gradual heat diffusion.
- **Sensation:** Gentle, gradual heat.
- **Uses:** Relaxation and perspiration.

Technology

Quartz: IR-A + IR-B + IR-C - emits IR-A, IR-B and IR-C for deep, targeted action.

Magnesium: IR-B + IR-C - diffuses IR-B and IR-C for enveloping, detoxifying warmth.

Carbon: IR-C - emits mainly IR-C for even diffusion and constant thermal comfort.

Saunas can combine one or more infrared technologies, enabling a fully personalised experience tailored to each user's needs and preferences (Full Spectrum: Quartz / Dual Healthy: Quartz + Magnesium / Triple Care: Quartz + Magnesium + Carbon)

Benefits

Performance & recovery

The deep heat relieves tension, speeds up muscle recovery, and improves mobility.

Gentle detox

At low temperatures, the body perspires intensely, eliminating toxins and revealing clearer skin.

Improved appearance of the skin

Infrared heat stimulates circulation and can help reduce the appearance of cellulite.

Incomparable thermal comfort

A gentle, controlled heat that envelops without overwhelming, ideal before or after exertion.

Overall revitalisation

Infrared stimulates circulation, boosts metabolism, and provides lasting relaxation of the mind.

Utopia

A journey into the heart of imagination

The traditional sauna experience in all its glory

A true invitation awaits you. A pause in your day, a moment set aside to relax.

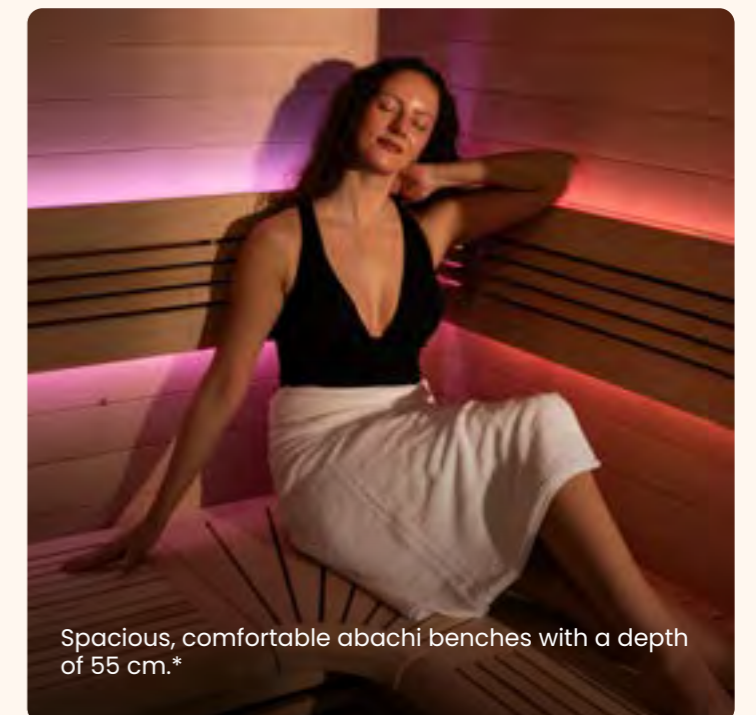

The warmth of a traditional sauna, the scent of solid wood, and a large glass surface. It's all here. Utopia conveys a sense of escape and freedom. A sanctuary where serenity returns and the mind drifts, carrying you wherever you wish to go.

 FSC-certified wood with 10-year guarantee

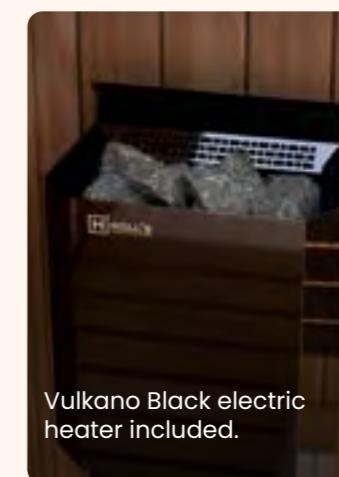

Crafted from Grade A Canadian hemlock, prized for its strength and resin-free qualities, these saunas offer a warm, refined, and lasting environment.

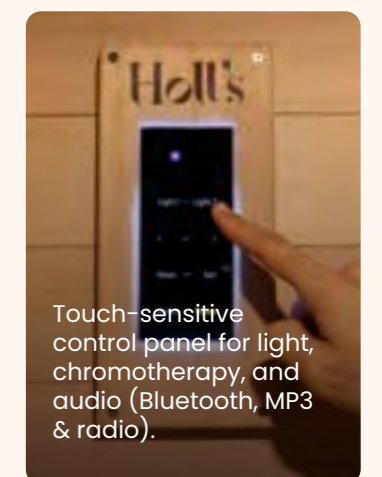

Up to 40 LED lights in seven colours set into the ceiling, creating a starry-sky chromotherapy effect.*

Spacious, comfortable abachi benches with a depth of 55 cm.*

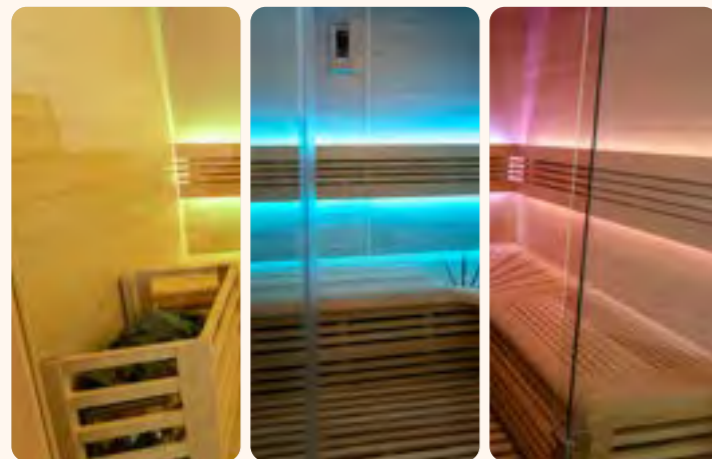

Vulkano Black electric heater included.

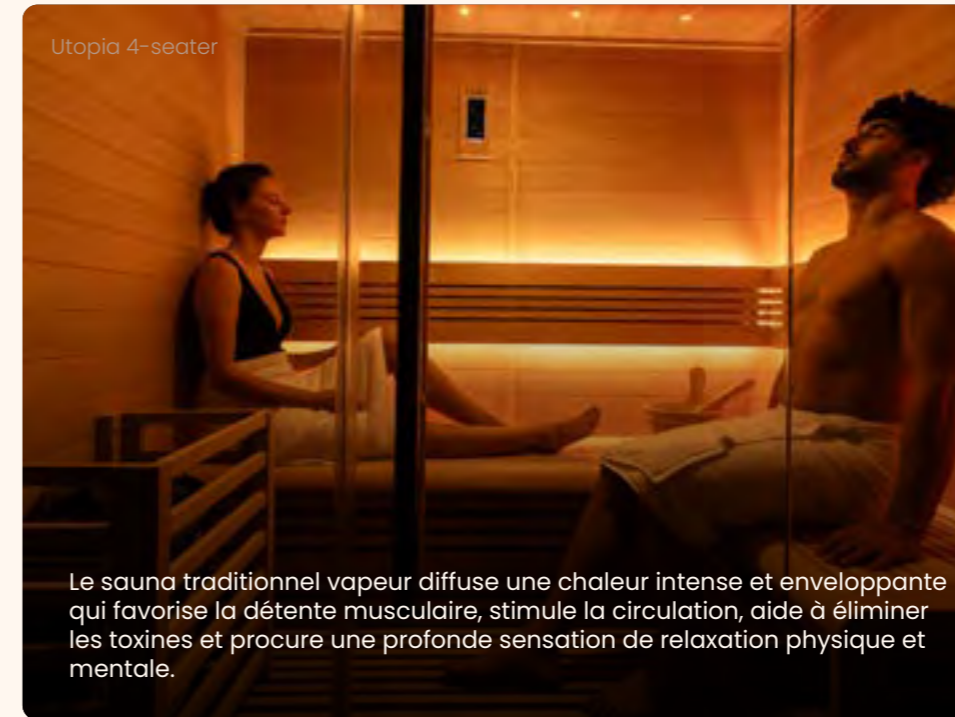

Touch-sensitive control panel for light, chromotherapy, and audio (Bluetooth, MP3 & radio).

*For the Utopia 4 & 6

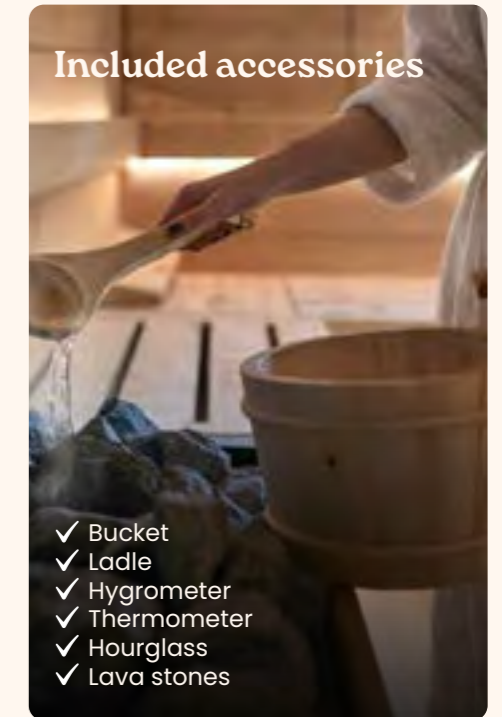

Enjoy the benefits of Chromotherapy

Chromotherapy uses variations in light and colour to positively influence mood and sensations. Integrated into the sauna, it promotes relaxation and emotional balance and enhances your overall feeling of wellbeing.

Le sauna traditionnel vapeur diffuse une chaleur intense et enveloppante qui favorise la détente musculaire, stimule la circulation, aide à éliminer les toxines et procure une profonde sensation de relaxation physique et mentale.

Moon

A luxurious haven for your moments of wellbeing

Bold design and infrared technology

With its unique circular design, the Moon sauna envelops the body in gentle, continuous heat, much like a cocoon.

The rounded panels are a result of meticulous work on the wood and glass, creating a perfect curvature for a deep feeling of envelopment and more even air circulation. Equipped with Dual Healthy infrared technology combined with carbon panels, Moon delivers heat that is both targeted and enveloping: the emitters work deep within the body to relieve tension and stimulate circulation, while the carbon ensures a gentle, even diffusion for lasting comfort.

Natural wood or deep black: the Moon sauna adapts to your world with two distinctive finishes.

Bring a contemporary design touch to your interior with this sauna.

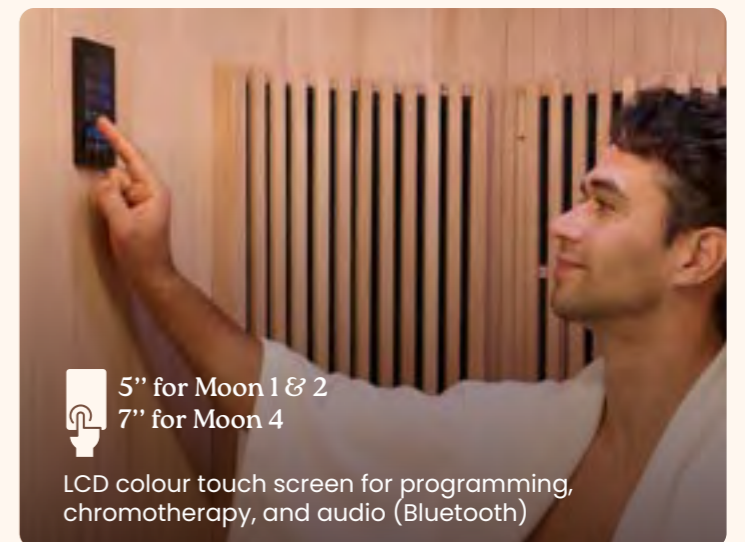

Infrared technology: Quartz + Carbon

IR-A **IR-B** **IR-C**

It emits IR-A, IR-B, and IR-C infrared waves for a complete, deep-penetrating action, promoting both muscle relaxation and recovery.

Your tailored infrared sauna session

This infrared sauna combines modern technology and deep wellbeing to fit seamlessly into your home.

Thanks to its gentle, targeted heat output, it delivers an enveloping warmth that supports muscle relaxation and recovery after exertion, without reaching the extreme temperatures of a traditional steam sauna. Crafted from premium materials such as hemlock and finished with meticulous care, it creates a soothing, accessible atmosphere, ideal for a personal space dedicated to recovery and renewal at home.

Infrared technology:
Quartz + Magnesium + Carbon

IR-A IR-B IR-C

This evolutionary technology allows you to create your own session à la carte:

- the adjustment dial controls allow you to change the intensity of each quartz emitter.
- Three types of emitters distributed throughout the entire cabin, including beneath the bench

A relaxing break from everyday life

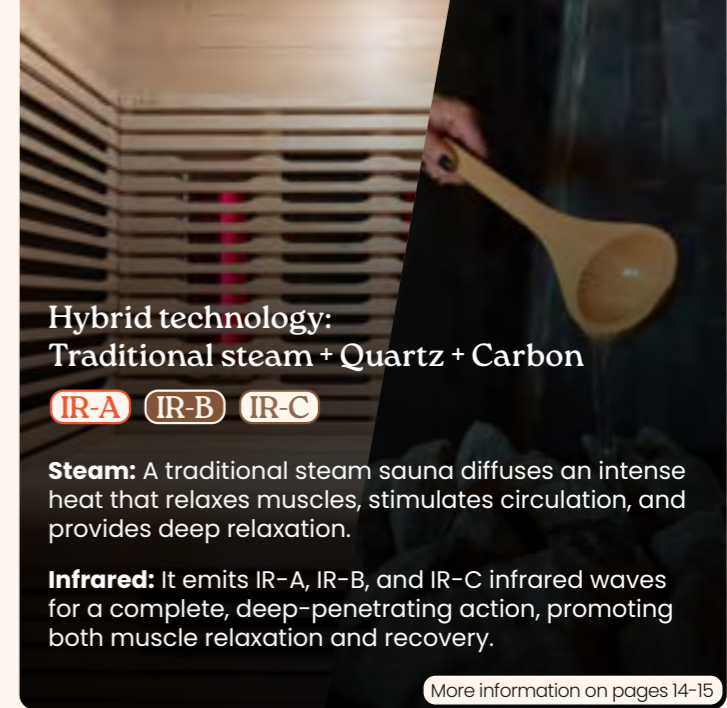

Symbioz Hybrid

The best of both worlds

Dual technology, one experience

Bringing together the best of both worlds in a single cabin: that's the promise of the Symbioz Hybrid sauna. It lets you choose between the enveloping authenticity of a traditional steam session or the speed and targeted effectiveness of infrared heat, for an experience that's perfectly tailored to your mood.

At the heart of its contemporary design, the Symbioz Hybrid features a premium Holl's heater alongside advanced infrared technology. There's just one question: which experience are you choosing today?

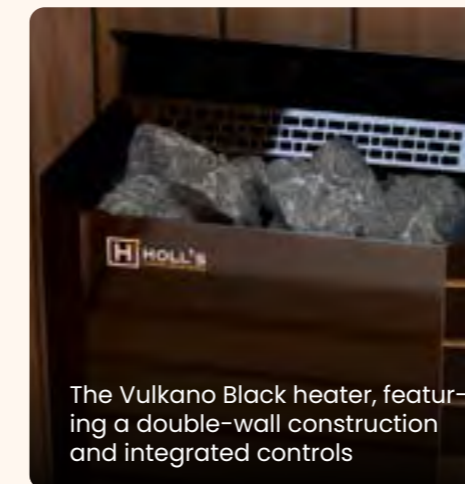

Hybrid technology:
Traditional steam + Quartz + Carbon

IR-A **IR-B** **IR-C**

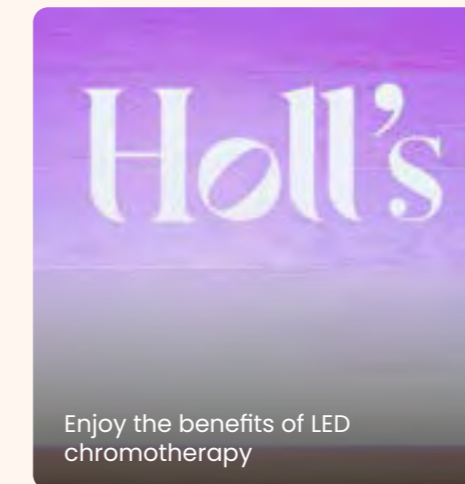

Steam: A traditional steam sauna diffuses an intense heat that relaxes muscles, stimulates circulation, and provides deep relaxation.

Infrared: It emits IR-A, IR-B, and IR-C infrared waves for a complete, deep-penetrating action, promoting both muscle relaxation and recovery.

WOOD-BURNING HEATER KIT **HARVIA**

Exclusively for Onyxia Barrel outdoor sauna

WOOD-BURNING HEATER

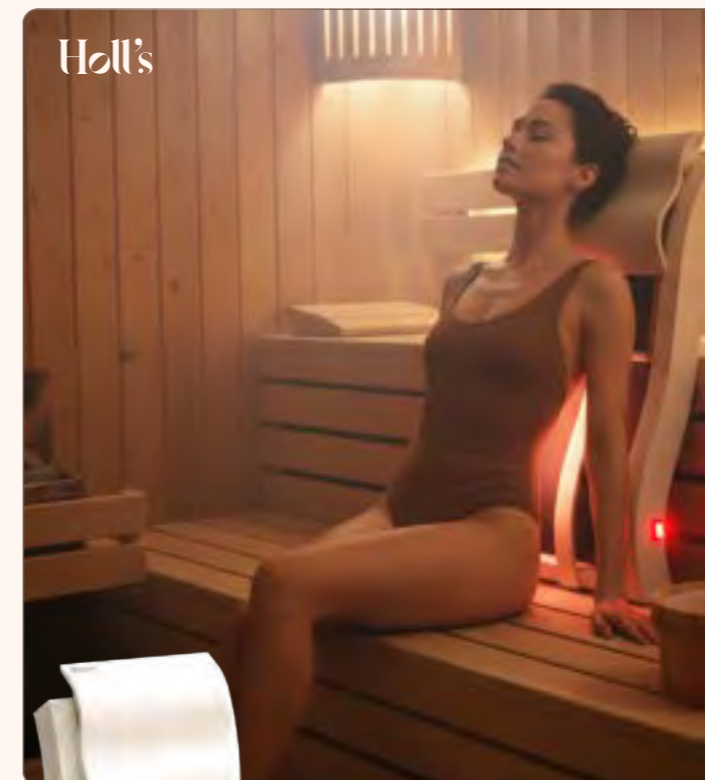

PROTECTION

FIREPLACE

SIDE PROTECTION

INFRARED HEATED BACKREST

Ergonomic backrest with integrated infrared heating element, crafted from high-quality aspen and featuring an adjustable headrest.

Ideal for bringing the benefits of infrared wherever you wish.

Power socket supplied. Plugs into any mains socket (220V).

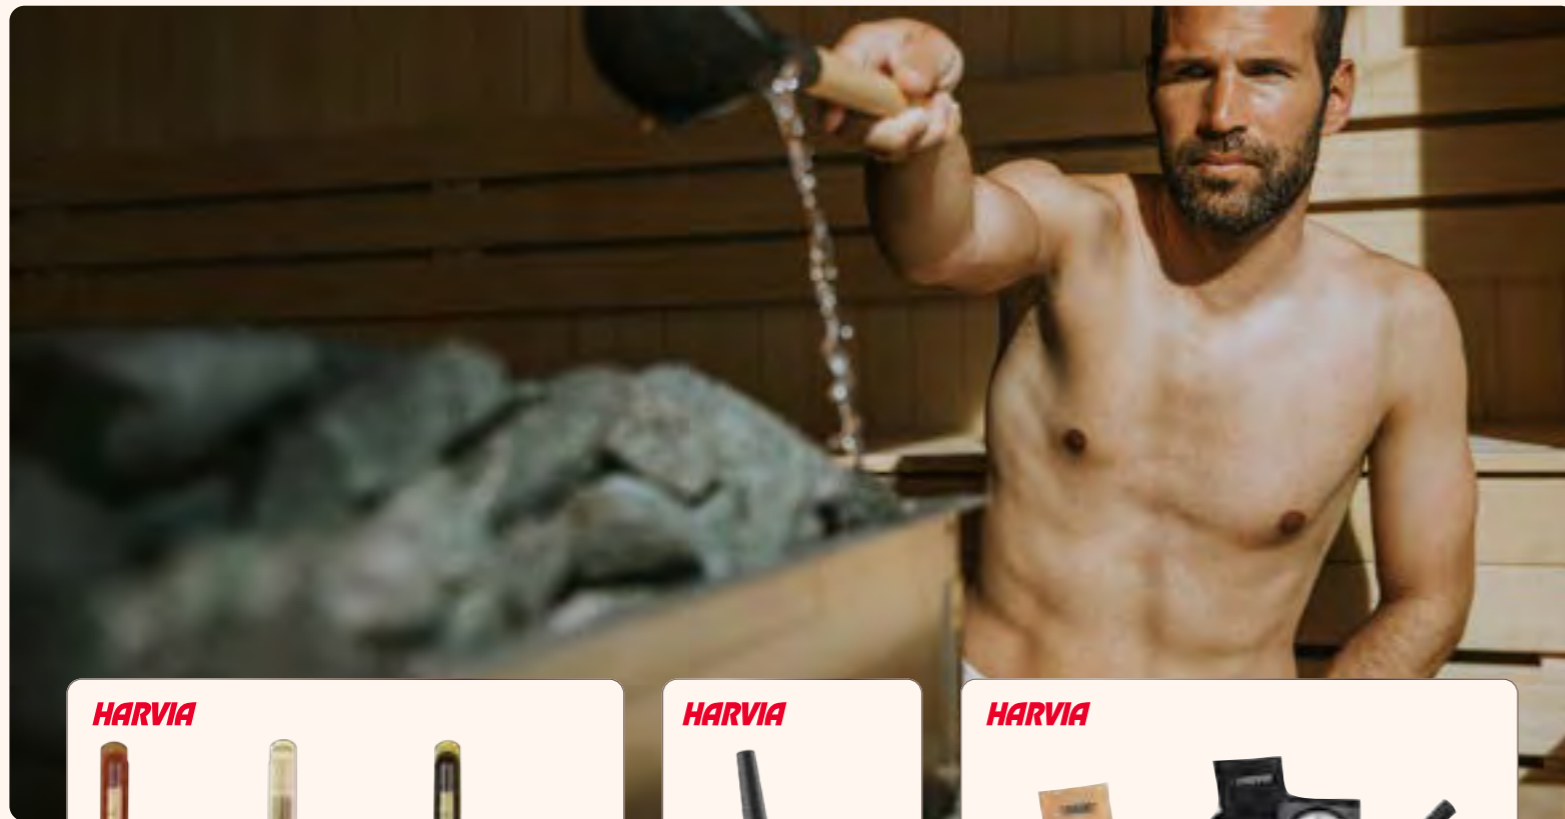

COLD WATER BUCKET

Wooden cold shower bucket with bracket. Anti-overflow system and 18L capacity. Perfect for the full Scandinavian experience.

WOODEN WALL HOOKS (3 OR 5 HOOKS)

Screw-on wooden hook, ideal for hanging towels and bathrobes at the entrance or exit of a sauna or spa.

HARVIA
HELMI ACCESSORIES KIT

Harvia kit made from recycled materials, including bucket, ladle, and hourglass.

HARVIA
ACCESSORY KIT

Plastic Harvia kit, including bucket and ladle.

HARVIA
STAINLESS STEEL ACCESSORY KIT

Stainless steel bucket and ladle, thermometer, and hygrometer.

Holl's
WOODEN SAUNA KIT

Traditional wooden sauna kit consisting of 2 sets: bucket (4L) + ladle, and thermometer + hourglass.

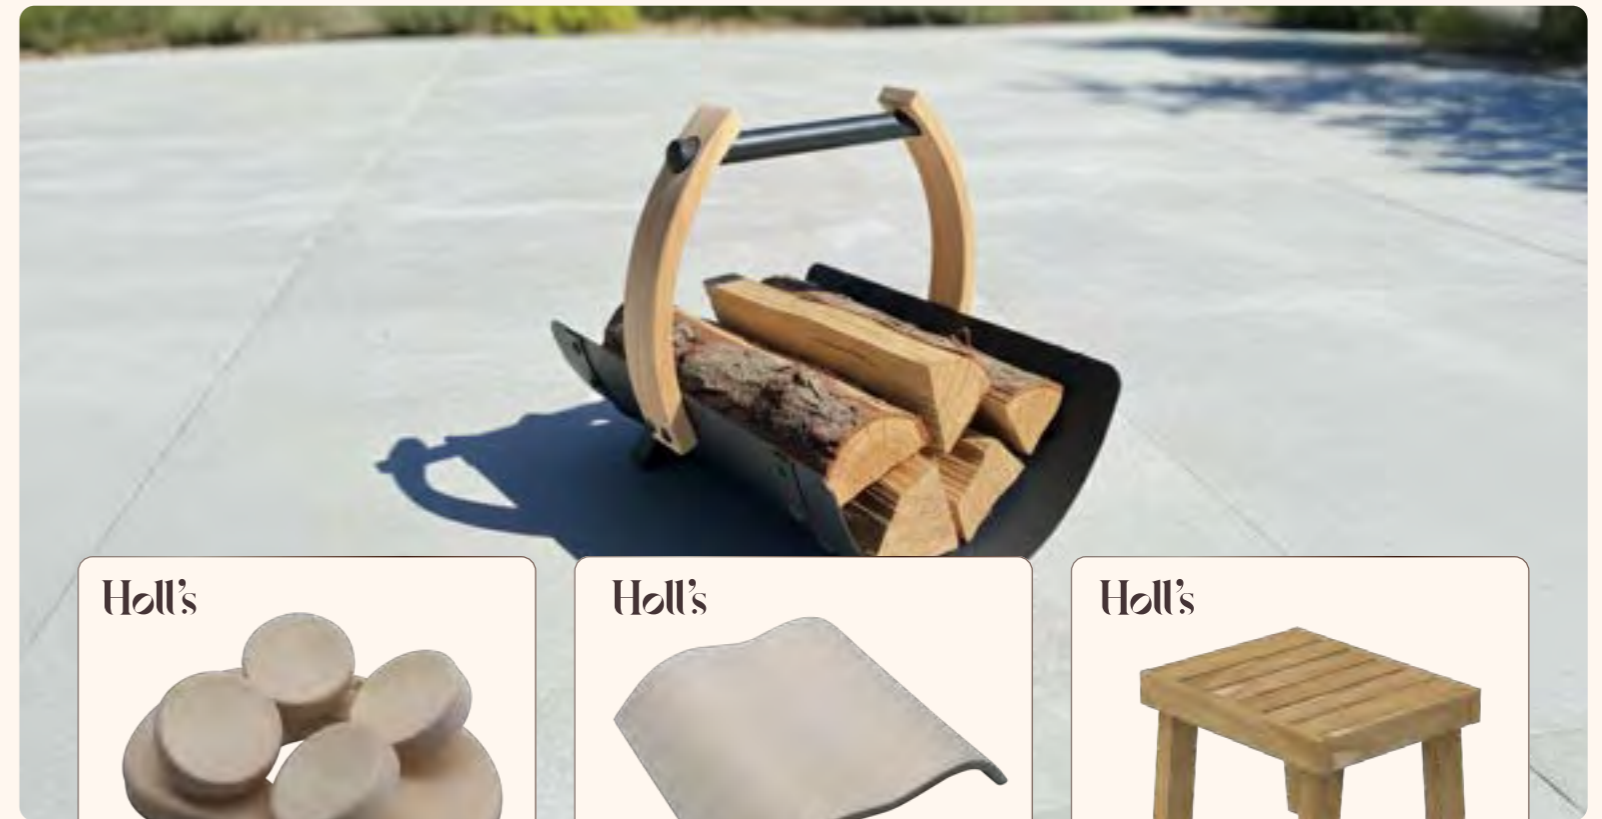

Holl's
STAINLESS STEEL SAUNA KIT

Traditional wooden and stainless steel* sauna kit consisting of a bucket (5L) and a ladle.
* for greater durability

Holl's
ONYXIA SAUNA KIT

Traditional black wood and stainless steel sauna kit consisting of 2 sets: bucket (4L) + ladle, and thermometer + hourglass.

Holl's
ERGONOMIC HEADRESTS

Ergonomic headrest that moulds perfectly to the shape of your head. Premium Aspen model. Compatible with all saunas that allow you to lie down.

Holl's
HEADRESTS

Sturdy, comfortable headrest. Premium cedar model. Compatible with all saunas that allow you to lie down. Dimensions: 18x23cm

Holl's
BENCH SEAT

Designed for adding space to your sauna, or as an occasional table. Perfectly resistant to heat and humidity thanks to its cedar composition. Dim 534 x 430 x 400mm

HARVIA
HARVIA LEGEND METAL BASKET

Wood-storage basket with a premium design. Outdoor sauna with wood-burning heater. Metal stand and high-quality wooden handle.

HARVIA
HARVIA STONE

Stones for electric or wood-burning heaters (20kg)

Holl's
ESSENTIAL OILS SET

Set of 4 x 100ml bottles of essential oils for sauna & hammam. This set contains the following fragrances: Finnish sauna, Eucalyptus, Cedarwood, and Sakura.

HARVIA
IPX6 WATERPROOF BLUETOOTH SPEAKER

Connect to the speaker for a moment of musical relaxation. Waterproof, heat-resistant (<65°C), with 8 hrs of autonomy (1800 mAh battery). USB charging.

SHELL

Lucite® acrylic

Holl's spa shells are made from Lucite® acrylic, ensuring exceptional durability and reliability.

The patented Lucite® ABS-PMMA shell combines the strength of acrylic with the durability of ABS, reinforced by two layers of high-density Sirtex insulation.

Technology dedicated to your well-being...

Designed with meticulous attention to detail, Holl's acrylic spas feature high-performance equipment that enhances water quality, thermal comfort, and massage precision. Each component contributes to a refined, enduring, and deeply relaxing experience.

Floating skimmer

The floating skimmer with integrated cartridge filtration ensures continuous, optimised surface filtration. Its automatic adjustment to the water level ensures consistent performance and crystal-clear water, session after session.

Heated air blower

Our spas are equipped with a heated air blower for an even more enriching hydrotherapy experience. Preheated air is injected through the air jets, preventing any drop in water temperature during oxygenation.

Venturi control dial

At each seat, it allows precise adjustment of the air-water mix in the massage jets.

Treatment: UV lamp

A UV lamp that complements the filtration system, neutralising bacteria and micro-organisms for healthier water while reducing the need for chemical treatments.

Warranty:
2 years (electrical)
10 years (wooden structure, shell)

Prestige range

Relaxation, wellbeing, and premium facilities

The perfect combination of contemporary design and optimum performance.

This range of spas combines performance and elegance, with a sleek, contemporary design. Designed for total relaxation, they are ideal for both individuals and athletes looking for a deep massage.

The Prestige range features patented weatherproof, UV-resistant and impact-resistant exterior panels made from durable materials. Compatible with Spawer (Poolex) heat pumps, these spas guarantee comfort and energy efficiency.

Fundermax panels

The exterior panels that elegantly clad Holl's spas are engineered using patented processes to withstand weathering, UV exposure, high temperatures, scratches, impacts, and solvents. They are made from a construction material used for durable cladding of terraces and facades.

Let yourself be drawn in by the chic design and extensive customisation options.

The Design range stands out for its Lucite® (or Aristech, depending on production) acrylic shells, a premium material that combines **strength and durability**. Reinforced with high-density **Sirtek** insulation, they offer **optimum insulation** and **rock-solid strength**. Each spa undergoes rigorous testing to ensure **impeccable reliability**. What's more, you have the option to **customise** the colour of the corners of the cladding, adding a unique touch to your wellness equipment.

Nomawood panels

They provide an elegant and durable coating for Holl's spas, with different aesthetic effects ranging from natural wood to contemporary finishes. Resistant to moisture, UV rays and the elements, they offer excellent durability and require very little maintenance.

COMPATIBLE WITH SPAWER HEAT PUMPS

Make the energy-saving choice by adding a Spawer heat pump to your spa.
